

The Registration, Evaluation and Authorisation of Chemicals
(REACH) EC Regulation 1907/2006

To whom it may concern,

The aforementioned REACH Regulations have been adopted within the European Union to manage the risks that chemicals in products may pose to human health and the Environment.

Prestwick Circuits GPS Ltd is not manufacturer of substances.

It does not import any substances in quantities greater than the 1 tonne threshold limit.

No substances are intentionally released from any articles supplied, therefore it is not required to register any substances.

All substances used by the supplier continue to be monitored to ensure that their REACH status can be monitored and controlled.

The most recent Candidate List updated in June 2011 detailing the Substances of Very High Concern (SVHCs). Prestwick Circuits GPS Ltd has legal obligations to declare to its customers any SVHCs which are present in products supplied at a level of greater than the minimum threshold level. None of the products supplied contain SVHCs greater than this minimum threshold level.

Should this position change Prestwick Circuits GPS Ltd will advise its customers accordingly.

If you require any additional information please do hesitate to contact me at any time.

Yours sincerely
Jim McDonald
Managing Director
